SKILLS

HTML/CSS
SASS/LESS
Javascript/Typescript
Python

React
React Hooks
React context API
Redux
Material UI

Node/Express
Java/Spring
Flask
SQLite
PostgreSQL

Git
Netlify
Heroku
React Testing Library
Jest

PROJECTS

The Ant's Knapsack   **April 2020**

HTML/CSS/VanillaJS | flask | socketio

- Fast-paced web game designed for players to compete for the highest score by optimizing their limited inventory
- Worked remotely with 4 developers over the course of one week
- Programmed socketio routes from client to server for multiplayer features
- Styled the in-game sprites and store display component
- the-ants-knapsack.netlify.app

MyDish   **December 2019**

React-native | PostgreSQL | Node/Express

- Mobile app designed for users to record and track changes to recipes over time
- Built to the specifications of the stakeholder, functioning on iOS and Android
- Worked on a remote team of 7 full-stack developers over 8 weeks
- Tested front-end and back-end for QA
- Deployed to Google Play Store
- play.google.com/store/apps/details?id=com.lambdaschool.mydish

/foundtext/   **June 2019**

React/Redux | Regex

- Web application designed to help users learn regex with drag'n'drop features
- Worked with 2 web developers during a 24hr hackathon
- Programmed text-field to highlight based on selected regular expressions
- Designed drag'n'drop feature to store each regex phrase in order
- foundtext.netlify.com

SleepMood   **August 2019**

React | PostgreSQL | Java/Spring

- Web app that recommends how long to sleep each day to feel well-rested
- Led project team with kanban/scrum workflow to hit deadlines each day
- Created backend server using Java/Spring, including endpoints, database connection, and authentication
- https://sleepmood.leananeparidze.now.sh/

EXPERIENCE

Team Lead   **August 2019 – March 2020**

Lambda School

- Provided daily 1:1 feedback and code reviews via Github, Zoom, and Slack
- Facilitated communication among team, and provided guidance for weekly study material through daily standup meetings
- Led several teams of student developers through product cycle including product releases, code debugging, stakeholder management, and continuous deployment

EDUCATION

Lambda School | Full Stack Web Development
Remote | March 2019 – Present

Berklee College of Music | Music Composition
54 credits | Remote | March 2019 – Present
